

As a talent manager, my favorite venues are the restored theatres which used to exist in almost every city throughout the USA. These beautiful structures seem to be harder to find every single year.

The Lincoln Theatre in Mount Vernon, WA is one of those treasures we love so much. The community is a better place for it. The theatre can best serve its audiences by keeping its sound system up to date and accessible to the hearing impaired as well as retaining the look and feel of those good ol' days gone by.

On behalf of Albert Lee, Cindy Cashdollar and me, we hope you can meet your goal and look forward to the day we can return.

The inclusion of a hearing loop in the theater's Sound + Hearing Campaign will be a perfect complement, to create a sound system serving all your patrons. The approximately 4800 hearing impaired residents in Skagit County will have the opportunity to participate and enjoy a night at the theater!

Line Array Speakers flown from the ceiling instead of floor speakers

Your donation will...

- ◆ Enrich overall sound quality in every seat for audiences at live dramatic and musical performances
- ◆ Upgrade equipment to meet the latest professional technical standards in sound reinforcement for performers
- ◆ Improve line of sight and free up stage area by moving speakers off the floor
- ◆ Provide the best possible sound for the hearing impaired
- ◆ Reduce the need to rent additional

Bring sound to life...

Your contribution toward meeting the \$150,000 Sound + Hearing Campaign, will allow the purchase and installation of a sound system custom-designed for the Lincoln Theatre:

- ◆ Line array speakers flown from the ceiling for a balanced sound mix and clear line of sight
- ◆ Six stage monitors
- ◆ Stage microphones and cabling
- ◆ Professional digital 64 channel mixing console to combine the dynamics of the many different audio signals
- ◆ Wireless headset microphone system for up to 24 stage performers
- ◆ Hearing loop to transmit sound directly to hearing aids, cochlear implants, and wireless receiving

Wireless headset microphones for live stage productions

Hearing Loop System...

The hearing loop is a wire circling the theatre and connecting directly to the sound system. The loop then transmits the sound electro-magnetically and is picked up by the telecoil in the hearing aid or cochlear implant. The hearing loop system will work with both live sound and film.

This custom-designed system will be tailored exclusively for the Lincoln Theatre to ensure fine audio quality in every seat.

This is an opportunity to connect the Lincoln Theatre and local community with high quality regional and national acts. The Lincoln Theatre will be a 'must' stop for performers on the I-5 corridor.

~Mitch Larson, Sound Events
